# Put all the columns from Excel to start

ID Number	First Name	Last Name	Course	Program	Start Date	End Date	Number of days attended

Number of days	Withdrawal point	Last Withdrawal Date	Attended past last withdrawal date?	Date Last Attended	Last Active Moodle	Future Bookings?	Weeks Left	Completed	Notes	Date

Extra arrow between 'Last Withdrawl Date' and 'Attended past...' is because we have too many cells that goes over the page when it saved on pdf, so splited into two lined but showing you they all supposed to be in one line.

1NF, Finding Primary Key(s), Dependancy and remove multivalued attributes.

ID Number	First Name	Last Name	Course	Program	Start Date	End Date	Number of days attended	Number of days	Withdrawal point	Last Withdrawal Date

Transitive
Transitive
Transitive

Attended past last withdrawal date?	Date Last Attended	Last Active Moodle	Future Bookings?	Weeks Left	Completed	Notes

Extra arrow between 'Last Withdrawl Date' and 'Attended past...' is because we have too many cells that goes over the page when it saved on pdf, so splited into two lined but showing you they all supposed to be in one line.

2NF, Must be in 1NF form, resolving Partial Dependancy

ID Number	First Name	Last Name

Course	Program

ID Number	Course	Start Date	Last Active Moodle	Completed	Notes

We don't have any Transitive Dependancy as most of them were calculated field, this is 2NF & 3NF
